

Human APAF1 (Apoptotic Peptidase Activating Factor 1) ELISA Kit | APAF1 elisa kit

Human APAF1 (Apoptotic Peptidase Activating Factor 1) ELISA Kit

CATALOG #
AAA270360

REACTIVITY
Human

PRODUCT SYNONYMS

APAF1 (Apoptotic Peptidase Activating Factor 1); Human APAF1 (Apoptotic Peptidase Activating Factor 1) ELISA Kit; CED4; Apoptotic Protease Activating Factor; APAF1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Tissue homogenates, cell lysates and other biological fluids
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.057 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for APAF1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Apoptotic Peptidase Activating Factor 1(APAF1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Apoptotic Peptidase Activating Factor 1(APAF1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Apoptotic Peptidase Activating Factor 1(APAF1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Apoptotic Peptidase Activating Factor 1(APAF1) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for APAF1 elisa kit
