

Human LFA1a (Lymphocyte Function Associated Antigen 1 Alpha) ELISA Kit | LFA1a elisa kit

Human LFA1a (Lymphocyte Function Associated Antigen 1 Alpha) ELISA Kit

CATALOG #
AAA270380

REACTIVITY
Human

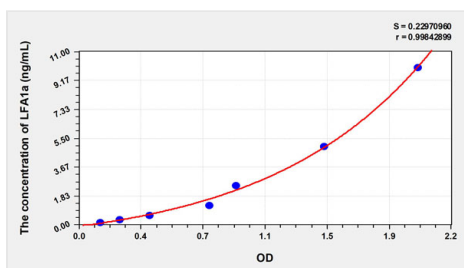

PRODUCT SYNONYMS

LFA1a (Lymphocyte Function Associated Antigen 1 Alpha); Human LFA1a (Lymphocyte Function Associated Antigen 1 Alpha) ELISA Kit; CD11a; ITG-AL; LFA-1; LFA1-A; ITGAL; Integrin; Alpha L; CD11 antigen-like family member A; Leukocyte function-associated molecule 1 alpha chain; LFA1a elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.055 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for LFA1a elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Lymphocyte Function Associated Antigen 1 Alpha(LFA1a). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Lymphocyte Function Associated Antigen 1 Alpha(LFA1a). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Lymphocyte Function Associated Antigen 1 Alpha(LFA1a), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Lymphocyte Function Associated Antigen 1 Alpha(LFA1a) in the samples is then determined by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
