

## Human LCN1 (Lipocalin 1) ELISA Kit | LCN1 elisa kit

Human LCN1 (Lipocalin 1) ELISA Kit

CATALOG #  
AAA270382

REACTIVITY  
Human

### PRODUCT SYNONYMS

LCN1 (Lipocalin 1); Human LCN1 (Lipocalin 1) ELISA Kit; TP; PMFA; VEGP; Tlc; Tear Prealbumin; Tear lipocalin; Protein Migrating Faster Than Albumin; Von Ebner Gland Protein; LCN1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                      |
|-------------------------|--------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                |
| Samples                 | serum, plasma, saliva, tears and other biological fluids and other biological fluids |
| Assay Type              | Sandwich                                                                             |
| Detection Range         | 1.57-100 ng/mL                                                                       |
| Sensitivity             | 0.62 ng/mL                                                                           |
| Intra-assay Precision   | CV%<8%                                                                               |
| Inter-assay Precision   | CV%<10%                                                                              |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                     |

### ADDITIONAL INFORMATION

#### Related Product Information for LCN1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Lipocalin 1(LCN1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Lipocalin 1(LCN1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Lipocalin 1(LCN1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Lipocalin 1(LCN1) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for LCN1 elisa kit

Metabolic pathway; Infection immunity; Cardiovascular biology

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
