

Human PLA1 (Phospholipase A1) ELISA Kit | PLA1 elisa kit

Human PLA1 (Phospholipase A1) ELISA Kit

CATALOG #
AAA270396

REACTIVITY
Human

PRODUCT SYNONYMS

PLA1 (Phospholipase A1); Human PLA1 (Phospholipase A1) ELISA Kit; PLA1A; ps-PLA1; NMD; Phosphatidylserine-Specific Phospholipase A1-Alpha; PLA1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	serum, plasma, tissue homogenates and other biological fluids
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.055 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for PLA1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Phospholipase A1(PLA1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Phospholipase A1(PLA1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Phospholipase A1(PLA1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Phospholipase A1(PLA1) in the samples is then determined by comparing the OD of the samples to the standard curve.
