

Human FPA (Fibrinopeptide A) ELISA Kit | FPA elisa kit

Human FPA (Fibrinopeptide A) ELISA Kit

CATALOG #
AAA270419

REACTIVITY
Human

PRODUCT SYNONYMS

FPA (Fibrinopeptide A); Human FPA (Fibrinopeptide A) ELISA Kit; FP-A; FPA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Competitive
Detection Range	1.57-100 ng/mL
Sensitivity	0.55 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for FPA elisa kit

Principle of the assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Fibrinopeptide A(FPA) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Fibrinopeptide A(FPA). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Fibrinopeptide A(FPA) in the samples is then determined by comparing the OD of the samples to the standard curve.
