

General AGE (Advanced Glycation End Product) ELISA Kit | AGE elisa kit

General AGE (Advanced Glycation End Product) ELISA Kit

CATALOG #
AAA270481

REACTIVITY
General

PRODUCT SYNONYMS

AGE (Advanced Glycation End Product); General AGE (Advanced Glycation End Product) ELISA Kit; AGEs; Advanced Glycation End Products; AGE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of General AGE. No significant cross-reactivity or interference between General AGE and analogues was observed.
Assay Type	Competitive
Detection Range	125-8000 ng/mL
Sensitivity	38.2 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8% Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10% Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for AGE elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Advanced Glycation End Product(AGE) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Advanced Glycation End Product(AGE). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Advanced Glycation End Product(AGE) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for AGE elisa kit

Metabolic pathway; Endocrinology; Cardiovascular biology; Hormone metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
