

## Human LDHA (Lactate Dehydrogenase A) ELISA Kit | LDHA elisa kit

Human LDHA (Lactate Dehydrogenase A) ELISA Kit

CATALOG #  
AAA270491

REACTIVITY  
Human

### PRODUCT SYNONYMS

LDHA (Lactate Dehydrogenase A); Human LDHA (Lactate Dehydrogenase A) ELISA Kit; LDH-A; LDH-M; LDH1; PIG19; Cell proliferation-inducing gene 19 protein; LDH muscle subunit; Renal carcinoma antigen NY-REN-59; LDHA elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                  |
|-------------------------|------------------------------------------------------------------|
| Reactivity              | Human                                                            |
| Samples                 | Serum, plasma, tissue homogenates and other biological fluids    |
| Assay Type              | Sandwich                                                         |
| Detection Range         | 0.16-10 ng/mL                                                    |
| Sensitivity             | 0.067 ng/mL                                                      |
| Intra-assay Precision   | CV%<8%                                                           |
| Inter-assay Precision   | CV%<10%                                                          |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt. |

### ADDITIONAL INFORMATION

#### Related Product Information for LDHA elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Lactate Dehydrogenase A(LDHA). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Lactate Dehydrogenase A(LDHA). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Lactate Dehydrogenase A(LDHA), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Lactate Dehydrogenase A(LDHA) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for LDHA elisa kit

Enzyme & Kinase; Metabolic pathway; Cardiovascular biology; Hepatology

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
