

Rat COL1 (Collagen Type I) ELISA Kit | COL1 elisa kit

Rat COL1 (Collagen Type I) ELISA Kit

CATALOG #
AAA271048

REACTIVITY
Rat

PRODUCT SYNONYMS

COL1 (Collagen Type I); Rat COL1 (Collagen Type I) ELISA Kit; COL1; COLI; COL1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	serum, plasma and other biological fluids
Assay Type	Sandwich
Detection Range	0.63-40 ng/mL
Sensitivity	0.239 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for COL1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Collagen Type I(COL1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Collagen Type I(COL1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Collagen Type I(COL1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450\text{nm} \pm 10\text{nm}$. The concentration of Collagen Type I(COL1) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for COL1 elisa kit

Metabolic pathway; Developmental science; Bone metabolism

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
