

Mouse TPPP (Tubulin Polymerization Promoting Protein) ELISA Kit | TPPP elisa kit

Mouse TPPP (Tubulin Polymerization Promoting Protein) ELISA Kit

CATALOG #
AAA271068

REACTIVITY
Mouse

PRODUCT SYNONYMS

TPPP (Tubulin Polymerization Promoting Protein); Mouse TPPP (Tubulin Polymerization Promoting Protein) ELISA Kit; TPPP1; p25alpha; p25; TPPP/p25; Brain Specific Protein p25 Alpha; 25 kDa brain-specific protein; TPPP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Tissue homogenates and other biological fluids.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.053 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for TPPP elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Tubulin Polymerization Promoting Protein(TPPP). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Tubulin Polymerization Promoting Protein(TPPP). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Tubulin Polymerization Promoting Protein(TPPP), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Tubulin Polymerization Promoting Protein(TPPP) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for TPPP elisa kit

Neuro science; Developmental science

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
