

Human HPR (Haptoglobin Related Protein) ELISA Kit | HPR elisa kit

Human HPR (Haptoglobin Related Protein) ELISA Kit

CATALOG #
AAA271154

REACTIVITY
Human

PRODUCT SYNONYMS

HPR (Haptoglobin Related Protein); Human HPR (Haptoglobin Related Protein) ELISA Kit; HP; HPR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids.
Assay Type	Sandwich
Detection Range	1.57-100 ng/mL
Sensitivity	0.69 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for HPR elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Haptoglobin Related Protein(HPR). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Haptoglobin Related Protein(HPR). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Haptoglobin Related Protein(HPR), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Haptoglobin Related Protein(HPR) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for HPR elisa kit
