

## Human PKR1 (Prokineticin Receptor 1) ELISA Kit | PKR1 elisa kit

Human PKR1 (Prokineticin Receptor 1) ELISA Kit

CATALOG #  
**AAA271205**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

PKR1 (Prokineticin Receptor 1); Human PKR1 (Prokineticin Receptor 1) ELISA Kit; PROKR1; PKR-1; GPR73; GPR-73a; ZAQ; PK-R1; G Protein-Coupled Receptor 73; G-protein coupled receptor ZAQ; PKR1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                  |
|-------------------------|------------------------------------------------------------------|
| Reactivity              | Human                                                            |
| Samples                 | Tissue homogenates and other biological fluids.                  |
| Assay Type              | Sandwich                                                         |
| Detection Range         | 0.63-40 ng/mL                                                    |
| Sensitivity             | 0.228 ng/mL                                                      |
| Intra-assay Precision   | CV%<8%                                                           |
| Inter-assay Precision   | CV%<10%                                                          |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt. |

### ADDITIONAL INFORMATION

#### Related Product Information for PKR1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Prokineticin Receptor 1(PKR1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Prokineticin Receptor 1(PKR1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Prokineticin Receptor 1(PKR1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Prokineticin Receptor 1(PKR1) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for PKR1 elisa kit
