

Human ECM1 (Extracellular Matrix Protein 1) ELISA Kit | ECM1 elisa kit

Human ECM1 (Extracellular Matrix Protein 1) ELISA Kit

CATALOG #
AAA271247

REACTIVITY
Human

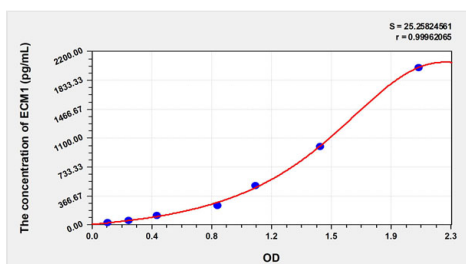

PRODUCT SYNONYMS

ECM1 (Extracellular Matrix Protein 1); Human ECM1 (Extracellular Matrix Protein 1) ELISA Kit; Secretory component p85; ECM1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
Assay Type	Sandwich
Detection Range	31.25-2000 pg/mL
Sensitivity	13.1 pg/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for ECM1 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Extracellular Matrix Protein 1(ECM1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Extracellular Matrix Protein 1(ECM1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Extracellular Matrix Protein 1(ECM1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Extracellular Matrix Protein 1(ECM1) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for ECM1 elisa kit

Tumor immunity; Infection immunity; Immune molecule; Dermatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
