

## Rat S100 (S100 Calcium Binding Protein) ELISA Kit | S100 elisa kit

Rat S100 (S100 Calcium Binding Protein) ELISA Kit

CATALOG #  
**AAA271299**

REACTIVITY  
**Rat**

### PRODUCT SYNONYMS

S100 (S100 Calcium Binding Protein); Rat S100 (S100 Calcium Binding Protein) ELISA Kit; S100-A1; S100A1; S100-Alpha; S-100 Protein; S-100 protein subunit alpha; S-100 protein alpha chain; S100 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                      |
|-------------------------|------------------------------------------------------------------------------------------------------|
| Reactivity              | Rat                                                                                                  |
| Samples                 | serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids |
| Assay Type              | Sandwich                                                                                             |
| Detection Range         | 0.16-10 ng/mL                                                                                        |
| Sensitivity             | 0.061 ng/mL                                                                                          |
| Intra-assay Precision   | CV%<8%                                                                                               |
| Inter-assay Precision   | CV%<10%                                                                                              |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                     |

### ADDITIONAL INFORMATION

#### Related Product Information for S100 elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to S100 Calcium Binding Protein(S100). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to S100 Calcium Binding Protein(S100). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain S100 Calcium Binding Protein(S100), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of S100 Calcium Binding Protein(S100) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for S100 elisa kit

Tumor immunity

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
