

Human OSCAR (Osteoclast Associated Receptor) ELISA Kit | OSCAR elisa kit

Human OSCAR (Osteoclast Associated Receptor) ELISA Kit

CATALOG #
AAA271323

REACTIVITY
Human

PRODUCT SYNONYMS

OSCAR (Osteoclast Associated Receptor); Human OSCAR (Osteoclast Associated Receptor) ELISA Kit; PIGR3; Osteoclast Associated; Immunoglobulin-Like Receptor; Polymeric immunoglobulin receptor 3; Poly-Ig receptor 3; OSCAR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates and other biological fluids
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.138 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for OSCAR elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Osteoclast Associated Receptor(OSCAR). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Osteoclast Associated Receptor(OSCAR). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Osteoclast Associated Receptor(OSCAR), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Osteoclast Associated Receptor(OSCAR) in the samples is then determined by comparing the OD of the samples to the standard curve.
