

Human HAase (Hyaluronidase) ELISA Kit | HAase elisa kit

Human HAase (Hyaluronidase) ELISA Kit

CATALOG #
AAA271327

REACTIVITY
Human

PRODUCT SYNONYMS

HAase (Hyaluronidase); Human HAase (Hyaluronidase) ELISA Kit; Hyaluronic Lase; Hyaluronidase; HAase elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates and other biological fluids
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.118 ng/mL
Intra-assay Precision	CV%<8%
Inter-assay Precision	CV%<10%
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for HAase elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Hyaluronidase(HAase). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Hyaluronidase(HAase). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Hyaluronidase(HAase), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Hyaluronidase(HAase) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for HAase elisa kit

Enzyme & Kinase; Tumor immunity; Hepatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
