

Human P4Ha3 (Prolyl-4-Hydroxylase Alpha Polypeptide III) ELISA Kit | P4Ha3 elisa kit

Human P4Ha3 (Prolyl-4-Hydroxylase Alpha Polypeptide III) ELISA Kit

CATALOG #
AAA271541

REACTIVITY
Human

PRODUCT SYNONYMS

P4Ha3 (Prolyl-4-Hydroxylase Alpha Polypeptide III); Human P4Ha3 (Prolyl-4-Hydroxylase Alpha Polypeptide III) ELISA Kit; Procollagen-Proline; 2-Oxoglutarate 4-Dioxygenase(Proline 4-Hydroxylase); Alpha Polypeptide III; P4Ha3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human P4Ha3. No significant cross-reactivity or interference between Human P4Ha3 and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.066 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for P4Ha3 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Prolyl-4-Hydroxylase Alpha Polypeptide III(P4Ha3). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Prolyl-4-Hydroxylase Alpha Polypeptide III(P4Ha3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Prolyl-4-Hydroxylase Alpha Polypeptide III(P4Ha3), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Prolyl-4-Hydroxylase Alpha Polypeptide III(P4Ha3) in the samples is then determined by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
