

Monkey soluble OX40 Ligand ELISA Kit | sOX4L elisa kit

Monkey soluble OX40 Ligand ELISA Kit

CATALOG #
AAA27156

REACTIVITY
Monkey

PRODUCT SYNONYMS

soluble OX40 Ligand; Monkey soluble OX40 Ligand ELISA Kit; sOX4L elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of sOX40L. No significant cross-reactivity or interference between sOX40L and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between sOX40L and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for sOX4L elisa kit	Principle of the Assay: sOX40L ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-sOX40L antibody and an sOX40L-HRP conjugate. The assay sample and buffer are incubated together with sOX40L-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the sOX40L concentration since sOX40L from samples and sOX40L-HRP conjugate compete for the anti-sOX40L antibody binding site. Since the number of sites is limited, as more sites are occupied by sOX40L from the sample, fewer sites are left to bind sOX40L-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The sOX40L concentration in each sample is interpolated from this standard curve. Intended Uses: This sOX40L ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Monkey sOX40L. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
