

Human OPTC (Opticin) ELISA Kit | OPTC elisa kit

Human OPTC (Opticin) ELISA Kit

CATALOG #
AAA272341

REACTIVITY
Human

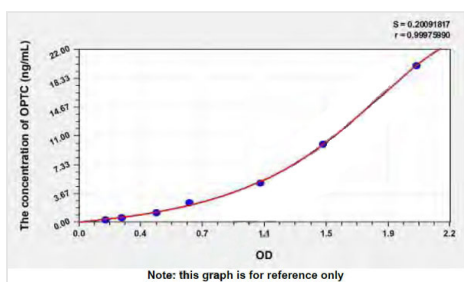

PRODUCT SYNONYMS

OPTC (Opticin); Human OPTC (Opticin) ELISA Kit; OPT; Oculoglycan; OPTC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human OPTC. No significant cross-reactivity or interference between Human OPTC and analogues was observed.
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.115 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)?CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)?CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for OPTC elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to OPTC. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to OPTC. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain OPTC, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of OPTC in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for OPTC elisa kit
