

## Human PKCa (Protein Kinase C Alpha) ELISA Kit | PKCa elisa kit

Human PKCa (Protein Kinase C Alpha) ELISA Kit

CATALOG #  
**AAA272931**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

PKCa (Protein Kinase C Alpha); Human PKCa (Protein Kinase C Alpha) ELISA Kit; PRKCA; PKC-A; AAG6; PKC-Alpha; PKCa elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Human PKCa. No significant cross-reactivity or interference between Human PKCa and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                              |
| Detection Range         | 31.25-2000 pg/mL                                                                                                                                                                      |
| Sensitivity             | 12.2 pg/mL                                                                                                                                                                            |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                 |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                      |

### ADDITIONAL INFORMATION

#### Related Product Information for PKCa elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Protein Kinase C Alpha(PKCa). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Protein Kinase C Alpha(PKCa). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Protein Kinase C Alpha(PKCa), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Protein Kinase C Alpha(PKCa) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for PKCa elisa kit

Signal transduction; Enzyme & Kinase; Neuro science

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
