

Human Activity regulated cytoskeleton associated protein (ARC) ELISA Kit | ARC elisa kit

Human Activity regulated cytoskeleton associated protein (ARC) ELISA Kit

CATALOG #
AAA27300

REACTIVITY
Human

PRODUCT SYNONYMS

Activity regulated cytoskeleton associated protein (ARC); Human Activity regulated cytoskeleton associated protein (ARC) ELISA Kit; ARC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of ARC. No significant cross-reactivity or interference between ARC and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between ARC and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for ARC elisa kit	Principle of the Assay: ARC ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-ARC antibody and an ARC-HRP conjugate. The assay sample and buffer are incubated together with ARC-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the ARC concentration since ARC from samples and ARC-HRP conjugate compete for the anti-ARC antibody binding site. Since the number of sites is limited, as more sites are occupied by ARC from the sample, fewer sites are left to bind ARC-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The ARC concentration in each sample is interpolated from this standard curve. Intended Uses: This ARC ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human ARC. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	8567330
NCBI GeneID	23237
NCBI Accession #	NP_056008.1
NCBI GenBank Nucleotide #	NM_015193.4
Molecular Weight	45,316 Da
NCBI Official Full Name	activity-regulated cytoskeleton-associated protein
NCBI Official Synonym Full Names	activity-regulated cytoskeleton-associated protein
NCBI Official Symbol	ARC
NCBI Official Synonym Symbols	Arg3.1
NCBI Protein Information	activity-regulated cytoskeleton-associated protein; ARC/ARG3.1; activity-regulated gene 3.1 protein homolog
UniProt Protein Name	Activity-regulated cytoskeleton-associated protein
UniProt Gene Name	ARC
UniProt Synonym Gene Names	KIAA0278; Arg3.1
UniProt Entry Name	ARC_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
