

## Mouse PLIN1 (Perilipin 1) ELISA Kit | PLIN1 elisa kit

Mouse PLIN1 (Perilipin 1) ELISA Kit

CATALOG #  
**AAA273075**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

PLIN1 (Perilipin 1); Mouse PLIN1 (Perilipin 1) ELISA Kit; PERI; PLIN1; Lipid Droplet Associated Protein; PLIN1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                                                   |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Mouse PLIN1. No significant cross-reactivity or interference between Mouse PLIN1 and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                                |
| Detection Range         | 0.16-10 ng/mL                                                                                                                                                                           |
| Sensitivity             | 0.061 ng/mL                                                                                                                                                                             |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                  |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                   |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                        |

### ADDITIONAL INFORMATION

#### Related Product Information for PLIN1 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Perilipin 1(PLIN1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Perilipin 1(PLIN1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Perilipin 1(PLIN1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Perilipin 1(PLIN1) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for PLIN1 elisa kit
