

Human SRY (Sex Determining Region Y) ELISA Kit | SRY elisa kit

Human SRY (Sex Determining Region Y) ELISA Kit

CATALOG #
AAA273126

REACTIVITY
Human

PRODUCT SYNONYMS

SRY (Sex Determining Region Y); Human SRY (Sex Determining Region Y) ELISA Kit; TDF; TDY; Testis-Determining Factor; SRY elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human SRY. No significant cross-reactivity or interference between Human SRY and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.055 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for SRY elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Sex Determining Region Y(SRY). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Sex Determining Region Y(SRY). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Sex Determining Region Y(SRY), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Sex Determining Region Y(SRY) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for SRY elisa kit
