

## Human NMU (Neuromedin U) ELISA Kit | NMU elisa kit

Human NMU (Neuromedin U) ELISA Kit

CATALOG #  
AAA273267

REACTIVITY  
Human

### PRODUCT SYNONYMS

NMU (Neuromedin U); Human NMU (Neuromedin U) ELISA Kit; NM-U; NMU elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                               |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Human NMU. No significant cross-reactivity or interference between Human NMU and analogues was observed. |
| Assay Type              | Competitive                                                                                                                                                                         |
| Detection Range         | 156.25-10000 pg/mL                                                                                                                                                                  |
| Sensitivity             | 48.3 pg/mL                                                                                                                                                                          |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.              |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.               |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                    |

### ADDITIONAL INFORMATION

#### Related Product Information for NMU elisa kit

**Principle of the Assay:** This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Neuromedin U(NMU) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Neuromedin U(NMU). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Neuromedin U(NMU) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for NMU elisa kit

Endocrinology; Cardiovascular biology; Neuro science; Gastroenterology; Hormone metabolism; Bone metabolism

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
