

## Rabbit MMP10 (Matrix Metalloproteinase 10) ELISA Kit | MMP10 elisa kit

Rabbit MMP10 (Matrix Metalloproteinase 10) ELISA Kit

CATALOG #  
**AAA273532**

REACTIVITY  
**Rabbit**

### PRODUCT SYNONYMS

MMP10 (Matrix Metalloproteinase 10); Rabbit MMP10 (Matrix Metalloproteinase 10) ELISA Kit; STMY2; SL2; Stromelysin 2; Transin-2; MMP10 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                           |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rabbit                                                                                                                                                                                    |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Rabbit MMP10. No significant cross-reactivity or interference between Rabbit MMP10 and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                                  |
| Detection Range         | 62.5-4000 pg/mL                                                                                                                                                                           |
| Sensitivity             | 25.2 pg/mL                                                                                                                                                                                |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                    |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                     |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                          |

### ADDITIONAL INFORMATION

#### Related Product Information for MMP10 elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Matrix Metalloproteinase 10(MMP10). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Matrix Metalloproteinase 10(MMP10). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Matrix Metalloproteinase 10(MMP10), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Matrix Metalloproteinase 10(MMP10) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for MMP10 elisa kit
