

## Mouse COL6a1 (Collagen Type VI Alpha 1) ELISA Kit | COL6a1 elisa kit

Mouse COL6a1 (Collagen Type VI Alpha 1) ELISA Kit

CATALOG #  
**AAA274140**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

COL6a1 (Collagen Type VI Alpha 1); Mouse COL6a1 (Collagen Type VI Alpha 1) ELISA Kit; COL6-A1; OPLL; Collagen Alpha-1(VI)chain; COL6a1 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                           |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                                                     |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Mouse COL6a1. No significant cross-reactivity or interference between Mouse COL6a1 and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                                  |
| Detection Range         | 0.63-40 ng/mL                                                                                                                                                                             |
| Sensitivity             | 0.207 ng/mL                                                                                                                                                                               |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                    |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                     |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                          |

### ADDITIONAL INFORMATION

#### Related Product Information for COL6a1 elisa kit

**Principle of the Assay:** The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Collagen Type VI Alpha 1(COL6a1). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Collagen Type VI Alpha 1(COL6a1). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Collagen Type VI Alpha 1(COL6a1), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Collagen Type VI Alpha 1(COL6a1) in the samples is then determined by comparing the OD of the samples to the standard curve.
