

Mouse COMT (Catechol-O-Methyltransferase) ELISA Kit | COMT elisa kit

Mouse COMT (Catechol-O-Methyltransferase) ELISA Kit

CATALOG #
AAA274421

REACTIVITY
Mouse

PRODUCT SYNONYMS

COMT (Catechol-O-Methyltransferase); Mouse COMT (Catechol-O-Methyltransferase) ELISA Kit; Catechol O methyltransferase; Catechol O-methyltransferase; COMT;; COMT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mouse COMT. No significant cross-reactivity or interference between Mouse COMT and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.058 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for COMT elisa kit	Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Catechol-O-Methyltransferase(COMT). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Catechol-O-Methyltransferase(COMT). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Catechol-O-Methyltransferase(COMT), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Catechol-O-Methyltransferase(COMT) in the samples is then determined by comparing the OD of the samples to the standard curve.
Product Categories/Family for COMT elisa kit	Enzyme & Kinase

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
