

Human Resolvin D2 ELISA Kit | RVD2 elisa kit

Human Resolvin D2 ELISA Kit

CATALOG #
AAA27464

REACTIVITY
Human

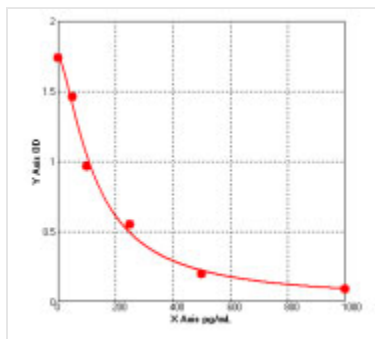

PRODUCT SYNONYMS

Resolvin D2; Human Resolvin D2 ELISA Kit; RVD2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of RVD2. No significant cross-reactivity or interference between RVD2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between RVD2 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for RVD2 elisa kit	Principle of the Assay: RVD2 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-RVD2 antibody and an RVD2-HRP conjugate. The assay sample and buffer are incubated together with RVD2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the RVD2 concentration since RVD2 from samples and RVD2-HRP conjugate compete for the anti-RVD2 antibody binding site. Since the number of sites is limited, as more sites are occupied by RVD2 from the sample, fewer sites are left to bind RVD2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The RVD2 concentration in each sample is interpolated from this standard curve. Intended Uses: This RVD2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human RVD2. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
---	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
