

Mouse Phosphatidylinositol Trisphosphate ELISA Kit | PIP3 elisa kit

Mouse Phosphatidylinositol Trisphosphate ELISA Kit

CATALOG #
AAA27475

REACTIVITY
Mouse

PRODUCT SYNONYMS

Phosphatidylinositol Trisphosphate; Mouse Phosphatidylinositol Trisphosphate ELISA Kit; PIP3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of PIP3. No significant cross-reactivity or interference between PIP3 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PIP3 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Intra-Assay	CV<10%
Inter-Assay	CV<15%
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PIP3 elisa kit	Principle of the Assay: PIP3 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PIP3 antibody and an PIP3-HRP conjugate. The assay sample and buffer are incubated together with PIP3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PIP3 concentration since PIP3 from samples and PIP3-HRP conjugate compete for the anti-PIP3 antibody binding site. Since the number of sites is limited, as more sites are occupied by PIP3 from the sample, fewer sites are left to bind PIP3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PIP3 concentration in each sample is interpolated from this standard curve. Intended Uses: This PIP3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse PIP3. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
--	--

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
