

Human SCUBE2 (Signal peptide, CUB and EGF-like domain-containing protein 2) ELISA Kit

| SCUBE2 elisa kit

Human SCUBE2 (Signal peptide, CUB and EGF-like domain-containing protein 2) ELISA Kit

CATALOG #
AAA27504

REACTIVITY
Human

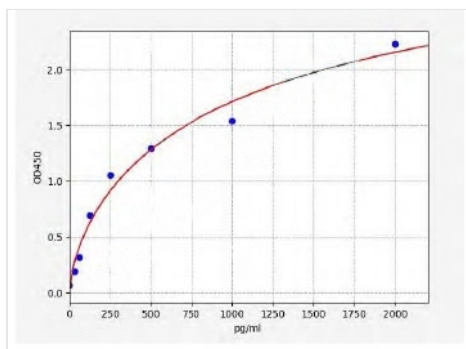

PRODUCT SYNONYMS

SCUBE2 (Signal peptide; CUB and EGF-like domain-containing protein 2); Human SCUBE2 (Signal peptide; CUB and EGF-like domain-containing protein 2) ELISA Kit; SCUBE2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of SCUBE2. No significant cross-reactivity or interference between SCUBE2 and analogues was observed.
Assay Type	Sandwich ELISA, Double Antibody
Samples	Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples
Detection Range	31.25-2000pg/ml
Sensitivity	18.75pg/ml
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for SCUBE2 elisa kit

Principle of the Assay: This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Capture antibody was pre-coated onto 96-well plates. And the biotin conjugated antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and washed with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the target amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of target can be calculated.

NCBI AND UNIPROT INFORMATION
