

## Cattle CCK (Cholecystokinin) ELISA Kit | CCK elisa kit

Cattle CCK (Cholecystokinin) ELISA Kit

CATALOG #  
AAA275436

REACTIVITY  
Cattle

### PRODUCT SYNONYMS

CCK (Cholecystokinin); Cattle CCK (Cholecystokinin) ELISA Kit; CCK-PZ; CCK elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Cattle                                                                                                                                                                                |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Cattle CCK. No significant cross-reactivity or interference between Cattle CCK and analogues was observed. |
| Assay Type              | Competitive                                                                                                                                                                           |
| Detection Range         | 15.63-1000 pg/mL                                                                                                                                                                      |
| Sensitivity             | 4.93 pg/mL                                                                                                                                                                            |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                 |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                      |

### ADDITIONAL INFORMATION

#### Related Product Information for CCK elisa kit

**Principle of the Assay:** This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Cholecystokinin(CCK) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Cholecystokinin(CCK). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Cholecystokinin(CCK) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for CCK elisa kit

Tumor immunity; Endocrinology; Neuro science; Hepatology; Hormone metabolism

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
