

Human LMO7 (LIM Domain Only Protein 7) ELISA Kit | LMO7 elisa kit

Human LMO7 (LIM Domain Only Protein 7) ELISA Kit

CATALOG #
AAA275444

REACTIVITY
Human

PRODUCT SYNONYMS

LMO7 (LIM Domain Only Protein 7); Human LMO7 (LIM Domain Only Protein 7) ELISA Kit; FBX20; FBXO20; LOMP; F-Box Only Protein 20; LMO7 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human LMO7. No significant cross-reactivity or interference between Human LMO7 and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.054 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for LMO7 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to LIM Domain Only Protein 7(LMO7). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to LIM Domain Only Protein 7(LMO7). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain LIM Domain Only Protein 7(LMO7), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of LIM Domain Only Protein 7(LMO7) in the samples is then determined by comparing the OD of the samples to the standard curve.
