

Human LIN28A (Lin-28 Homolog A) ELISA Kit | LIN28A elisa kit

Human LIN28A (Lin-28 Homolog A) ELISA Kit

CATALOG #
AAA275474

REACTIVITY
Human

PRODUCT SYNONYMS

LIN28A (Lin-28 Homolog A); Human LIN28A (Lin-28 Homolog A) ELISA Kit; ZCCHC1; CSDD1; LIN28; Zinc finger CCHC domain-containing protein 1; LIN28A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human LIN28A. No significant cross-reactivity or interference between Human LIN28A and analogues was observed.
Assay Type	Sandwich
Detection Range	62.5-4000 pg/mL
Sensitivity	21.9 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for LIN28A elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Lin-28 Homolog A(LIN28A). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Lin-28 Homolog A(LIN28A). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Lin-28 Homolog A(LIN28A), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Lin-28 Homolog A(LIN28A) in the samples is then determined by comparing the OD of the samples to the standard curve.
