

General ADMA (Asymmetrical Dimethylarginine) ELISA Kit | ADMA elisa kit

General ADMA (Asymmetrical Dimethylarginine) ELISA Kit

CATALOG #
AAA275637

REACTIVITY
General

PRODUCT SYNONYMS

ADMA (Asymmetrical Dimethylarginine); General ADMA (Asymmetrical Dimethylarginine) ELISA Kit; N; N-Dimethylarginine; NG; NG-Dimethylarginine dihydrochloride; Asymmetric Dimethylarginine; ADMA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of General ADMA. No significant cross-reactivity or interference between General ADMA and analogues was observed.
Assay Type	Competitive
Detection Range	15.63-1000 ng/mL
Sensitivity	4.51 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for ADMA elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Asymmetrical Dimethylarginine(ADMA) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Asymmetrical Dimethylarginine(ADMA). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Asymmetrical Dimethylarginine(ADMA) in the samples is then determined by comparing the OD of the samples to the standard curve.
