

CXCL15 (C-X-C motif chemokine 15) ELISA Kit | CXCL15 elisa kit

Mouse CXCL15 (C-X-C motif chemokine 15) ELISA Kit

CATALOG # AAA27586	REACTIVITY Mouse. This ELISA detects CXCL15 (Uniprot: Q9WVL7), which is sometimes called IL-8. Please inquire for more details.
------------------------------	---

PRODUCT SYNONYMS

CXCL15 (C-X-C motif chemokine 15); Mouse CXCL15 (C-X-C motif chemokine 15) ELISA Kit; CXCL15; IL-8; Lungkine; Scyb15; Weche; CXCL15 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse. This ELISA detects CXCL15 (Uniprot: Q9WVL7), which is sometimes called IL-8. Please inquire for more details.
Specificity	Specifically recognize IL-8/cxcl15, no obvious cross reaction with other analogues
Sequence Length	99
Assay Type	Sandwich
Samples	Serum, plasma, cell culture supernatant and other biological samples
Detection Range	15.625-1000pg/ml
Sensitivity	9.375pg/ml
Intra-assay Precision	Intra-assay Precision: samples with low, medium and high concentration are tested 20 times on same plate.
Inter-assay Precision	Inter-assay Precision: samples with low, medium and high concentration are tested 20 times on three different plates.
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for CXCL15 elisa kit	Background: Interleukin-8 (IL-8) is a cytokine belonging to the chemokine family, mainly produced by macrophages, endothelial cells, and epithelial cells after stimulation by inflammation, pathogen infection, and other factors. IL-8 can induce white blood cells to migrate to the site of inflammation through its receptors CXCR1 and CXCR2, and participate in physiological and pathological processes such as inflammatory response, immune response, and tumor occurrence. In addition, IL-8 also has functions such as promoting angiogenesis, cell proliferation, and metastasis, and is therefore considered a cytokine associated with tumors. IL-8 plays an important role in the development of various diseases such as cancer, cardiovascular disease, and autoimmune diseases. Principle of the Assay: This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Anti IL-8/cxcl15 antibody was pre-coated onto the 96-well plate. The biotin conjugated anti IL-8/cxcl15 antibody was used as the detection antibody. The standards and pilot samples were added to the wells subsequently. After incubation, unbound conjugates were removed by wash buffer. Then, biotinylated detection antibody was added to bind with IL-8/cxcl15 conjugated on coated antibody. After washing off unbound conjugates, HRP-Streptavidin was added. After a third washing, TMB substrates were added to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that turned yellow after adding a stop solution. Read the O.D. absorbance at 450nm in a microplate reader. The concentration of IL-8/cxcl15 in the sample was calculated by drawing a standard curve. The concentration of the target substance is proportional to the OD450 value.
