

General SAM (S-Adenosyl Methionine) ELISA Kit | SAM elisa kit

General SAM (S-Adenosyl Methionine) ELISA Kit

CATALOG #
AAA275870

REACTIVITY
General

PRODUCT SYNONYMS

SAM (S-Adenosyl Methionine); General SAM (S-Adenosyl Methionine) ELISA Kit; SAMe; SAM-e; S-Adenosylmethionine; S-(5'-Adenosyl)-L-Methionine Chloride; SAM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of General SAM. No significant cross-reactivity or interference between General SAM and analogues was observed.
Assay Type	Competitive
Detection Range	15.63-1000 ng/mL
Sensitivity	4.84 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for SAM elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with S-Adenosyl Methionine(SAM) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to S-Adenosyl Methionine(SAM). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of S-Adenosyl Methionine(SAM) in the samples is then determined by comparing the OD of the samples to the standard curve.
