

## General PS (Phosphatidylserine) ELISA Kit | PS elisa kit

General PS (Phosphatidylserine) ELISA Kit

CATALOG #  
**AAA275906**

REACTIVITY  
**General**

### PRODUCT SYNONYMS

PS (Phosphatidylserine); General PS (Phosphatidylserine) ELISA Kit; Ptd-L-Ser; PtdSer; PS elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | General                                                                                                                                                                               |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of General PS. No significant cross-reactivity or interference between General PS and analogues was observed. |
| Assay Type              | Competitive                                                                                                                                                                           |
| Detection Range         | 18.75-1200 ng/mL                                                                                                                                                                      |
| Sensitivity             | 5.27 ng/mL                                                                                                                                                                            |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                 |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                      |

### ADDITIONAL INFORMATION

#### Related Product Information for PS elisa kit

**Principle of the Assay:** This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Phosphatidylserine(PS) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Phosphatidylserine(PS). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm  $\pm$  10nm. The concentration of Phosphatidylserine(PS) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for PS elisa kit

Neuro science; Developmental science; Nutrition metabolism

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
