

General Tau (Taurine) ELISA Kit | Tau elisa kit

General Tau (Taurine) ELISA Kit

CATALOG #
AAA275964

REACTIVITY
General

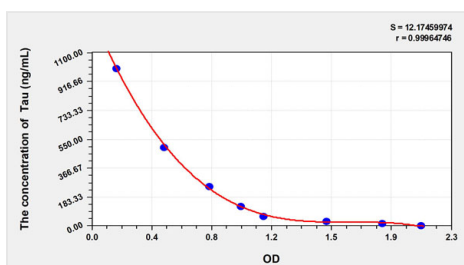

PRODUCT SYNONYMS

Tau (Taurine); General Tau (Taurine) ELISA Kit; 2-Aminoethanesulfonic Acid; Tauric Acid; Tau elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of General Tau. No significant cross-reactivity or interference between General Tau and analogues was observed.
Assay Type	Competitive
Detection Range	15.63-1000 ng/mL
Sensitivity	4.39 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for Tau elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Taurine(Tau) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Taurine(Tau). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Taurine(Tau) in the samples is then determined by comparing the OD of the samples to the standard curve.
