

## General NTM (Natamycin) ELISA Kit | NTM elisa kit

General NTM (Natamycin) ELISA Kit

CATALOG #  
**AAA275975**

REACTIVITY  
**General**

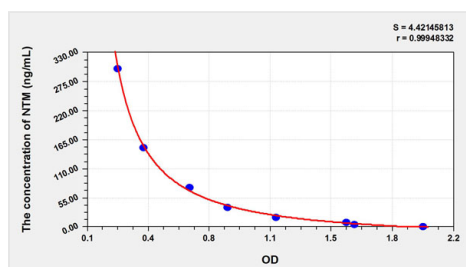

### PRODUCT SYNONYMS

NTM (Natamycin); General NTM (Natamycin) ELISA Kit; Pimaricin; Naticyn; NTM elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | General                                                                                                                                                                                 |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of General NTM. No significant cross-reactivity or interference between General NTM and analogues was observed. |
| Assay Type              | Competitive                                                                                                                                                                             |
| Detection Range         | 4.69-300 ng/mL                                                                                                                                                                          |
| Sensitivity             | 1.45 ng/mL                                                                                                                                                                              |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                  |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                   |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                        |

### ADDITIONAL INFORMATION

#### Related Product Information for NTM elisa kit

**Principle of the Assay:** This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate vided in this kit has been pre-coated with Natamycin(NTM) protein. Standards or samples are added he appropriate microtiter plate wells then with a biotin-conjugated antibody specific to amycin(NTM). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate l and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated he addition of sulphuric acid solution and the color change is measured spectrophotometrically at a velength of 450nm ± 10nm. The concentration of Natamycin(NTM) in the samples is then ermined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for NTM elisa kit
