

Human 15-HETE (15-Hydroxyeicosatetraenoic Acid) ELISA Kit | 15-HETE elisa kit

Human 15-HETE (15-Hydroxyeicosatetraenoic Acid) ELISA Kit

CATALOG #
AAA276030

REACTIVITY
Human

PRODUCT SYNONYMS

15-HETE (15-Hydroxyeicosatetraenoic Acid); Human 15-HETE (15-Hydroxyeicosatetraenoic Acid) ELISA Kit; 15-HETE; 15-Hydroxyeicosatetraenoic Acid); 15-HETE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human 15-HETE. No significant cross-reactivity or interference between Human 15-HETE and analogues was observed.
Assay Type	Competitive
Detection Range	0.13-8 ng/mL
Sensitivity	0.1 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for 15-HETE elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with 15-Hydroxyeicosatetraenoic Acid(15-HETE) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to 15-Hydroxyeicosatetraenoic Acid(15-HETE). Next,Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of 15-Hydroxyeicosatetraenoic Acid(15-HETE) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for 15-HETE elisa kit

Signal transduction; Metabolic pathway; Infection immunity; Hormone metabolism; Dermatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
