

Fish TKT (Transketolase) ELISA Kit | TKT elisa kit

Fish TKT (Transketolase) ELISA Kit

CATALOG #
AAA276149

REACTIVITY
Fish

PRODUCT SYNONYMS

TKT (Transketolase); Fish TKT (Transketolase) ELISA Kit; TK; Wernicke-Korsakoff Syndrome; TKT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Fish
Specificity	This assay has high sensitivity and excellent specificity for detection of Fish TKT. No significant cross-reactivity or interference between Fish TKT and analogues was observed.
Assay Type	Sandwich
Detection Range	0.16-10 ng/mL
Sensitivity	0.075 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for TKT elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Transketolase(TKT). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Transketolase(TKT). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Transketolase(TKT), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of Transketolase(TKT) in the samples is then determined by comparing the OD of the samples to the standard curve.
