

General Lipoteichoic Acids (LTA) ELISA Kit | LTA elisa kit

General Lipoteichoic Acids (LTA) ELISA Kit

CATALOG #
AAA276364

REACTIVITY
General

PRODUCT SYNONYMS

Lipoteichoic Acids (LTA); General Lipoteichoic Acids (LTA) ELISA Kit; LTA; LTA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of LTA4. No significant cross-reactivity or interference between LTA4 and analogues was observed.
Assay Type	Competitive
Detection Range	0.31-20 ng/mL
Sensitivity	0.13 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)? CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for LTA elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Lipoteichoic Acids (LTA) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Lipoteichoic Acids (LTA). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Lipoteichoic Acids (LTA) in the samples is then determined by comparing the OD of the samples to the standard curve.
