

Fish CAT (Catalase) ELISA Kit | CAT elisa kit

Fish CAT (Catalase) ELISA Kit

CATALOG #
AAA276422

REACTIVITY
Fish

PRODUCT SYNONYMS

CAT (Catalase); Fish CAT (Catalase) ELISA Kit; Cat; Cas-1; Cas1Catalase; CAT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Fish
Specificity	This assay has high sensitivity and excellent specificity for detection of Zebrafish CAT. No significant cross-reactivity or interference between Zebrafish CAT and analogues was observed.
Detection Range	15.63-1000 pg/mL
Sensitivity	6.5 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)?CV% < 8%. Three samples of known concentration were tested twenty times on 1 plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (precision between assays)?CV% < 10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for CAT elisa kit

Principle of the assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Catalase(CAT). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Catalase(CAT). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Catalase(CAT), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Catalase(CAT) in the samples is then determined by comparing the OD of the samples to the standard curve.

Product Categories/Family for CAT elisa kit

Enzyme & Kinase; Metabolic pathway; Hepatology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
