

Rat a1BG (Alpha-1-B-Glycoprotein) ELISA Kit | a1BG elisa kit

Rat a1BG (Alpha-1-B-Glycoprotein) ELISA Kit

CATALOG #
AAA276431

REACTIVITY
Rat

PRODUCT SYNONYMS

a1BG (Alpha-1-B-Glycoprotein); Rat a1BG (Alpha-1-B-Glycoprotein) ELISA Kit; Alpha 1 B Glycoprotein; Alpha 1 beta Glycoprotein; a1BG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Rat a1BG. No significant cross-reactivity or interference between Rat a1BG and analogues was observed.
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.147 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for a1BG elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Alpha-1-B-Glycoprotein(a1BG). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Alpha-1-B-Glycoprotein(a1BG). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Alpha-1-B-Glycoprotein(a1BG), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Alpha-1-B-Glycoprotein(a1BG) in the samples is then determined by comparing the OD of the samples to the standard curve.
