

Human sTWEAK (soluble tumor necrosis factor-like weak inducer of apoptosis) ELISA Kit | sTWEAK elisa kit

Human sTWEAK (soluble tumor necrosis factor-like weak inducer of apoptosis) ELISA Kit

CATALOG #
AAA276436

REACTIVITY
Human

PRODUCT SYNONYMS

sTWEAK (soluble tumor necrosis factor-like weak inducer of apoptosis); Human sTWEAK (soluble tumor necrosis factor-like weak inducer of apoptosis) ELISA Kit; soluble tumor necrosis factor like weak inducer of apoptosis; sTWEAK; sTWEAK elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human sTWEAK. No significant cross-reactivity or interference between Human sTWEAK and analogues was observed.
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.147 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for sTWEAK elisa kit	Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to sTWEAK(soluble tumor necrosis factor-like weak inducer of apoptosis). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to sTWEAK(soluble tumor necrosis factor-like weak inducer of apoptosis). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain sTWEAK(soluble tumor necrosis factor-like weak inducer of apoptosis), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of sTWEAK(soluble tumor necrosis factor-like weak inducer of apoptosis) in the samples is then determined by comparing the OD of the samples to the standard curve.
Product Categories/Family for sTWEAK elisa kit	CD & Adhesion molecule

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
