

Horse ASMA (Anti-Smooth Muscle Antibody) ELISA Kit | ASMA elisa kit

Horse ASMA (Anti-Smooth Muscle Antibody) ELISA Kit

CATALOG #
AAA276519

REACTIVITY
Horse

PRODUCT SYNONYMS

ASMA (Anti-Smooth Muscle Antibody); Horse ASMA (Anti-Smooth Muscle Antibody) ELISA Kit; ASM Ab; Anti Smooth Muscle Antibody; ASMA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Horse
Specificity	This assay has high sensitivity and excellent specificity for detection of Horse ASMA. No significant cross-reactivity or interference between Horse ASMA and analogues was observed.
Assay Type	Sandwich
Detection Range	7.82-500 ng/mL
Sensitivity	2.9 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to ASMA(Anti-Smooth Muscle Antibody). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to ASMA(Anti-Smooth Muscle Antibody). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain ASMA(Anti-Smooth Muscle Antibody), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of ASMA(Anti-Smooth Muscle Antibody) in the samples is then determined by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
