

Human SOX17 (Sex Determining Region Y Box Protein 17) ELISA Kit | SOX17 elisa kit

Human SOX17 (Sex Determining Region Y Box Protein 17) ELISA Kit

CATALOG #
AAA276634

REACTIVITY
Human

PRODUCT SYNONYMS

SOX17 (Sex Determining Region Y Box Protein 17); Human SOX17 (Sex Determining Region Y Box Protein 17) ELISA Kit; SRY (sex determining region Y) box 17; SRY box 17; Transcription factor SOX-17; SRY related HMG box transcription factor SOX17; SOX17 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human SOX17. No significant cross-reactivity or interference between Human SOX17 and analogues was observed.
Assay Type	Sandwich
Detection Range	0.32-20 ng/mL
Sensitivity	0.122 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Preparation and Storage	Store at 2-8 degree C. Stable for 6 months from date of receipt.

ADDITIONAL INFORMATION

Related Product Information for SOX17 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to SOX17(Sex Determining Region Y Box Protein 17). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to SOX17(Sex Determining Region Y Box Protein 17). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain SOX17(Sex Determining Region Y Box Protein 17), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm $\pm$ 10nm. The concentration of SOX17(Sex Determining Region Y Box Protein 17) in the samples is then determined by comparing the OD of the samples to the standard curve.
