

## Human SALL4 (Sal-like protein 4) ELISA Kit | SALL4 elisa kit

Human SALL4 (Sal-like protein 4) ELISA Kit

CATALOG #  
**AAA276713**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

SALL4 (Sal-like protein 4); Human SALL4 (Sal-like protein 4) ELISA Kit; ZNF797; Zinc finger protein 797; Zinc finger protein SALL4; SALL4 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                   |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of Human SALL4. No significant cross-reactivity or interference between Human SALL4 and analogues was observed. |
| Assay Type              | Sandwich                                                                                                                                                                                |
| Detection Range         | 15.63-1000 pg/mL                                                                                                                                                                        |
| Sensitivity             | 6.2 pg/mL                                                                                                                                                                               |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.                  |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.                   |
| Preparation and Storage | Store at 2-8 degree C. Stable for 6 months from date of receipt.                                                                                                                        |

### ADDITIONAL INFORMATION

#### Related Product Information for SALL4 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to SALL4(Sal-like protein 4). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to SALL4(Sal-like protein 4). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain SALL4(Sal-like protein 4), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of SALL4(Sal-like protein 4) in the samples is then determined by comparing the OD of the samples to the standard curve.

#### Product Categories/Family for SALL4 elisa kit

Epigenetics and Nuclear Signaling; Developmental Biology

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
