### PRODUCT SYNONYMS

AMACR/P504S; Monoclonal Antibody; AMACR/P504S Mouse mAb; Alpha-Methylacyl Coenzyme A Racemase ;RACE; 2-methylacyl-CoA racemase; anti-AMACR/P504S antibody

### PRODUCT SPECIFICATIONS

|                                                       |                                                           |
|-------------------------------------------------------|-----------------------------------------------------------|
| Host                                                  | Mouse                                                     |
| Reactivity                                            | Human, Rat, Mouse                                         |
| Clonality                                             | Monoclonal                                                |
| Isotype                                               | IgG1                                                      |
| Form/Format                                           | PBS with 0.02% sodium azide and 50% glycerol pH7.4.       |
| Concentration                                         | 1mg/ml (varies by lot)                                    |
| Applicable Applications for anti-AMACR/P504S antibody | IHC (Immunohistochemistry), WB (Western Blot)             |
| Species                                               | Human                                                     |
| Immunogen                                             | Synthetic Peptide                                         |
| Preparation and Storage                               | Store at -20 degree C. Avoid repeated freeze-thaw cycles. |

### IMAGES

#### IHC (Immunohistochemistry)

IHC staining of mouse prostate adenocarcinoma tissue with AMACR/P504S mouse mAb(4A12) diluted at 1:200.

#### WB (Western Blot)

Western blot analysis of 1) HepG2, 2) Mouse Kidney with AMACR/P504S mAb diluted at 1:1,000.

### ADDITIONAL INFORMATION

|                                                           |                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for anti-AMACR/P504S antibody | AMACR has been recently described as prostate cancer-specific gene that encodes a protein involved in the beta-oxidation of branched chain fatty acids. Expression of AMACR protein is found in prostatic adenocarcinoma but not in benign prostatic tissue. It stains premalignant lesions of prostate: high-grade prostatic intraepithelial neoplasia (PIN) and atypical adenomatous hyperplasia. |
