

Human RLN3 (Relaxin 3) ELISA Kit | RLN3 elisa kit

Human RLN3 (Relaxin 3) ELISA Kit

CATALOG #
AAA277008

REACTIVITY
Human

PRODUCT SYNONYMS

RLN3 (Relaxin 3); Human RLN3 (Relaxin 3) ELISA Kit; ZINS4; RXN3; H3; INSL7; Insulin-like peptide 7; Prorelaxin H3; RLN3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human RLN3. No significant cross-reactivity or interference between Human RLN3 and analogues was observed.
Assay Type	Sandwich
Detection Range	156.25-10000 pg/mL
Sensitivity	43.6 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay)? CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision.
Inter-assay Precision	Inter-assay Precision (Precision between assays)? CV%<10%. Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.

ADDITIONAL INFORMATION

Related Product Information for RLN3 elisa kit

Principle of the Assay: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Relaxin3(RLN3). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Relaxin3(RLN3). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Relaxin3(RLN3), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm± 10nm. The concentration of Relaxin3(RLN3) in the samples is then determined by comparing the OD of the samples to the standard curve.
