

Rat FKBPL (FK506 Binding Protein Like Protein) ELISA Kit | FKBPL elisa kit

Rat FKBPL (FK506 Binding Protein Like Protein) ELISA Kit

CATALOG #
AAA277227

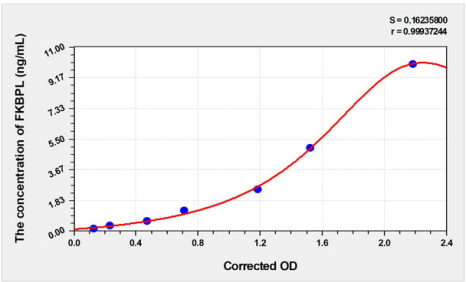

REACTIVITY
Rat

PRODUCT SYNONYMS

FKBPL (FK506 Binding Protein Like Protein); Rat FKBPL (FK506 Binding Protein Like Protein) ELISA Kit; NG7; WISP39; DIR1; WAF-1/CIP1 stabilizing protein 39; FKBPL elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Assay Type	Sandwich
Samples	Tissue homogenates, cell lysates and other biological fluids
Detection Range	0.16-10ng/mL
Sensitivity	0.057ng/mL
Standard	10ng/mL
Assay Length	3.5h
Precision	Intra-assay Precision (Precision within an assay): CV%<8% Three samples of known concentration were tested twenty times on one plate to assess intra-assay precision. Inter-assay Precision (Precision between assays): CV%<10% Three samples of known concentration were tested in forty separate assays to assess inter-assay precision.
Test Principle	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to FK506 Binding Protein Like Protein (FKBPL). Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to FK506 Binding Protein Like Protein (FKBPL). Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain FK506 Binding Protein Like Protein (FKBPL), biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 10 nm. The concentration of FK506 Binding Protein Like Protein (FKBPL) in the samples is then determined by comparing the OD of the samples to the standard curve.
Standard Curve	Matrices listed below were spiked with certain level of recombinant FKBPL and the recovery rates were calculated by comparing the measured value to the expected amount of FKBPL in samples. Matrix Recovery range Average serum (n=5) 86-99% 92% EDTA plasma (n=5) 80-97% 88% Heparin plasma (n=5) 86-99% 92%
Recovery Rate	The linearity of the kit was assayed by testing samples spiked with appropriate concentration of FKBPL and their serial dilutions. The results were demonstrated by the percentage of calculated concentration to the expected. Matrix 1:21:41:81:16 serum (n=5) 87-98% 92-101% 82-98% 89-102% EDTA plasma (n=5) 83-96% 79-93% 81-93% 86-98% Heparin plasma (n=5) 92-101% 88-102% 87-102% 93-102%
